ARSHIYA NAAZ

GIS Engineer | Geospatial Data Analyst | Map Evaluator

Phone - *+91 6364595393*
Email - arshiyanaaz7798@gmail.com
LinkedIn - **https://www.linkedin.com/in/arshiya-naaz-4051482a1**
Nationality - *Indian*
Gender - *Female*

Professional Summary

Geospatial professional with a background in civil engineering, specializing in remote sensing, satellite image processing, and machine learning based spatial analysis. Skilled in Python, Google Earth Engine, ArcGIS, and QGIS with practical experience in environmental monitoring and forest carbon prediction. The combination of GIS expertise and civil engineering knowledge translates well into land-use planning, infrastructure development, and environmental project work.

Technical Skills

GIS Software
QGIS | ArcGIS | SNAP

Remote Sensing
Google Earth Engine | Google earth Pro

Data & Analysis
Spatial Analysis | Geostatistics |
DTM Processing | Temporal Analysis

Field & Survey Tools
GPS | Total station

CAD & Design
AutoCAD | Revit | 3Ds Max

Programming & Database
Python | SQL | Machine
Learning (Basic) | Excel

Standard & Formats
Shapefile | GeoTIFF | KML/KMZ

Software Skills
Technical report writing
Analytical Problem Solving

Experience (2 Years)

◆ Map Evaluator (Freelance) - Peroptyx (August 2025) - Present

- Assess and validate digital map data across multiple regions, ensuring accuracy of road networks, points of interest, and business listings for use in mapping and navigation platforms
- Apply structured evaluation frameworks and cross-reference multiple data sources (street view, satellite imagery, local listings) to deliver high-confidence accuracy assessments

- Maintain a consistent track record of quality and reliability across a high volume of independent evaluation tasks, adapting quickly to evolving project guidelines
- Contribute to improving map data integrity used by end-users for navigation and location-based services

◆ **AI Trainer (Freelance, Project-Based) - Arctic Engine (September 2026 - Present)**

- Generate domain-specific, conversational English speech datasets across 12 verticals to support ASR, NLU, and voice AI model training and fine-tuning.
- Deliver high-fidelity, low-noise audio with accurate phonetic articulation, natural prosody, and consistent speaking rate, optimized for model generalization.
- Adhere to structured data collection protocols and multi-stage QA benchmarks, incorporating reviewer feedback to meet dataset quality and compliance standards.
- Contribute to human-in-the-loop AI training workflows by supplying high-quality, guideline-compliant data that improves model accuracy, accent robustness, and real-world conversational performance

◆ **Research Experience - (July 2024 - July 2025)**
[*National Institute of Technology Karnataka, Department of water resource and Ocean Engineering*]

- Designed and led an independent research project analyzing five years (2019–2024) of climate and air quality data for Mangalore, integrating Sentinel-5P satellite data, CPCB ground station records, and MERRA-2 meteorological datasets
- Analyzed five major pollutants (PM2.5, PM10, NO_2, SO_2, CO), validating satellite data against ground measurements to ensure analytical accuracy
- Applied QGIS spatial interpolation to map seasonal pollution patterns, identifying hotspots near industrial zones and transport corridors
- Built SVR and Gradient Boosting models to forecast pollution trends, achieving strongest predictive accuracy for NO_2 and SO_2
- Identified key climate-pollution relationships (e.g., rainfall suppressing particulate levels) and translated findings into recommendations for urban air quality planning
- Authored research paper *"Impact of Climate Variability on Air Pollution in Mangalore (2019–2024)"*, in preparation for peer-reviewed journal submission

Education & Practical Training

◆ **Master in Technology (Mtech) - Geoinformatics (CGPA-7.55)** *2023 - 2025*
National Institute of Technology Karnataka ● Mangalore, India
Thesis: Impact of Climate Variability on Air Pollution Levels in the Mangalore Region: A Remote Sensing-Based Assessment.
Internship- Dept of Forest State government of Karnataka - Mtech (2024): Comparative Analysis of Machine Learning models for Carbon Stock Prediction in Bandipur Forest

◆ **Bachelor of Engineering (B.E) - Civil (CGPA-7.31)** *2018 - 2021*

PES Institute of Technology & Management ● Shimoga, India

◆ **Diploma - Civil Engineering (Percentage - 73.06%)** *2015 - 2018*
PES Polytechnic ● Shimoga, India
